Novo Nordisk A/S Global Development, Haemostasis goes live with an Investigator Portal solution based on InnovoPOINT™—deploying and validating the leading Microsoft SharePoint 2007.

IRVINE, CA – April 28, 2010 –Novo Nordisk A/S, one of the world’s leading biopharmaceutical companies, is now using InnovoPOINT™ 3.0 by InnovoCommerce for a strategic Microsoft SharePoint-based clinical investigator portal. InnovoPOINT helps life science companies streamline the distribution of documents and clinical trial information to study sites. The InnovoPOINT solution leverages the significant investments Microsoft continues to make in SharePoint technologies for enterprise collaboration, content management and portal capability. The product introduces significant enhancements to SharePoint to help clinical organizations subject to health authority regulations as well as Good Clinical Practices (GCPs).

In 2009 Novo Nordisk’s Global Development, Haemostasis identified SharePoint as a strategic portal platform to facilitate and streamline clinical collaboration and secure information exchange. During the solution evaluation process Novo Nordisk A/S identified InnovoCommerce as an ideal strategic partner for the effort based on the company’s existing SharePoint-based product development and expertise, services offerings and software development capabilities in GxP environments. Novo Nordisk A/S required a strategic and agile partner, with deep SharePoint technical expertise, life science process knowledge and validation experience to help this therapeutic group meets its goals and objectives using the SharePoint platform. As part of the turnkey product and service offering, InnovoCommerce included SharePoint validation partner company Epista IT which is at the forefront of providing SharePoint qualification and validation services.

According to Jeannett Dimsits, Project Director, Global Development, Haemostasis “ This Portal gives Novo Nordisk a unique opportunity to communicate and collaborate with our trial sites in a timely, secure and GCP compliant manner. This tool will add great value both internally as well as externally.”

The InnovoPOINT solution is configured, deployed and validated faster than any other clinical investigator portal solution on the market worldwide. If the solution is installed in a Life Science organization’s existing SharePoint environment then the joint InnovoCommerce and Epista IT team provide turnkey validation services to apply GAMP 5 risk-based approaches to qualify the SharePoint environment as well as supply IQ and OQ documentation for solution validation.

The InnovoPOINT solution can also be installed, managed and validated in InnovoCommerce's SAS 70 II, GxP compliant national data center partner environment. The hosted option requires no hardware purchases and includes all the necessary software and support services.

About InnovoCommerce LLC.

Founded in 2008, InnovoCommerce is a privately held company offering Microsoft SharePoint-based clinical and investigator portal, enterprise content management and life science portfolio management decision making solutions. The company brings a unique set of combined expertise focusing on the Microsoft platform, systems integration and life science markets. The company is the leading company focusing on qualifying Microsoft SharePoint technologies and validating applications in FDA regulated environments.
