InnovoCommerce LLC announces Microsoft SharePoint 2010™ FDA 21 CFR Part 11 compliant document management offering with complete qualification and validation services

IRVINE, CA – Monday June 14, 2010 – InnovoCommerce LLC, the makers of innovoPOINT™, the leading SharePoint-based clinical and investigator portal solution, announces the release of a compelling new compliance offering utilizing Microsoft SharePoint 2010. This innovative service helps life science organizations rapidly and cost-effectively utilize Microsoft SharePoint 2010 to meet FDA 21 CFR Part 11 and other regulatory compliance requirements. InnovoCommerce does not require a software license fee for this offering.

The adoption of SharePoint technologies throughout the life science industry has been extensive. A growing demand for SharePoint document control and compliance has stimulated an emerging market for software product vendors to extend and enhance the SharePoint platform to help meet compliance requirements. Many companies seek to use SharePoint to ensure document compliance for multiple regulatory requirements; however, optimally they want to avoid expending significant additional capital on third-party bolt-on products. With the introduction of feature and functional advancements to SharePoint 2010 it is now possible to configure, extend and deploy SharePoint 2010 in a validated state with no need for expensive bolt-on compliance software.

Based on extensive market feedback, and growing client demand, InnovoCommerce announces the SharePoint 2010 compliance program packaged offering. InnovoCommerce has already released a SharePoint 2007 product that helps facilitate FDA compliance. The InnovoCommerce SharePoint 2010 compliance program requires no expensive bolt-on software licenses. Once an enterprise purchases their SharePoint 2010 licenses the InnovoCommerce team executes the turnkey compliance offering which includes the following reusable consulting components:

- SharePoint Qualification including risk matrix and governance tools
- Best practice configuration guide for R&D, SOP Management, Clinical and Corporate Compliance
- SharePoint 2010 extension configuration including lifecycle management, electronic signatures, and advanced audit trail and reporting
- SharePoint 2010 packaged validation including IQ and OQ scripts and PQ staff augmentation

The new SharePoint 2010 compliance offering can be secured for one fixed project fee. All services are provided turnkey by InnovoCommerce. The offering includes a flexible approach to

achieving advanced workflow, electronic signatures and document transformation services when required by the client. The new SharePoint 2010 Compliance Program offering provides clients the most economical and accelerated approach to leveraging SharePoint technologies for regulatory compliance worldwide.
